

CDC failure-recovery lab

Every recorded run, newest first. A card opens that run's full report: checks, fault timeline, the four boundary charts and the reconciliation.

capacity capacity-20260924T033813Z

slot state

capture-pressure capture-pressure-20260923T153833Z

PASS · 9/9

2,593,434

rows reconciled

0

missing, ghost or different

1.48 GB

WAL retained during the outage

recovery recovery-20260923T151517Z

PASS · 9/9

2,663,117

rows reconciled

0

missing, ghost or different

5,010,701

backlog drained

Runs that fail are kept on purpose: a checker that passes everything proves nothing.
